

TECH YOUR APPLICATOR

Ag Leader's DirectCommand® lineup offers a range of application technology to meet the individual needs of your farm operation with complete applicator control and visibility from the InCommand® Go 16 display.

Shown on the InCommand Go 16

DirectCommand L2

Through the InCommand, achieve variable rate and section control for your sprayer, NH3 applicator, or liquid fertilizer application. ISOBUS compatible controller also available.

RightSpot®

Take your sprayer to the next level of accuracy and performance. Automatic nozzle-by-nozzle swath control and turn compensation ensure the right amount of spray reaches every part of your field. Independent rate and pressure control gives you the confidence and flexibility to operate in challenging terrain and maximize productivity.

BoomLoop™

An automated recirculation solution, BoomLoop is seamlessly integrated into the InCommand displays and provides sprayer operators a simple, effective way to prime, reagitate, and flush boom contents. Requires RightSpot.

Section or nozzle-by-nozzle control

Buildable system to RightSpot

Industry-leading visibility

Increased speed and productivity
