

ENERGY

The Energy Division offers insight into Energy Sales as well as Operations. The energy team provides opportunities that include testing tanks, servicing customers, and gaining a better understanding of what it takes to help producers keep equipment moving and on the go.

OPERATIONS

Interns divide their summer learning about each operational role within agronomy, grain, energy and feed. From driving skid steers to practicing on an application simulator, interns will learn the crucial role operations play at the cooperative. Interns will take what they learn and compete in the annual Ag Olympics, too!

MARKETING

Interns will work alongside the Marketing Team to create videos, strategize website and social media tactics, design printed material and more as they work to promote the cooperative way of business. In addition, interns learn how the in-house CVA Print Shop allows us to create anything from direct mailers to truck decals to billboards.

BE PART OF SOMETHING MORE

The Central Valley Ag internship program was established in 2011 to provide opportunities to students with interest in the agricultural industry. CVA builds a strong relationship with students during their ten-week internship, in the end hoping to hire these talented individuals as full-time employees.

Our interns explore career paths and job duties throughout Central Valley Ag. This includes, but is not limited to, working with our outstanding sales team, grain marketing experts, creative marketing professionals, operations managers, talent specialists, IT support, and top of the line agronomists.

CENTRAL VALLEY AG

is a farmer-owned cooperative with locations in Iowa, Kansas, and Nebraska. We serve more than 14,000 member-owners throughout our locations, making us one of the strongest cooperatives in the Midwest.

At Central Valley Ag, we take our mission seriously. CVA specializes in bringing value to our customers through innovative solutions in agronomy, energy, feed, and grain products. We are committed to being a leader in the cooperative world and ensuring the long-term success of our employees and customers. As we adapt to an ever-changing world, we are excited to continue serving present and future generations.

OUR MISSION

Embracing the Cooperative Spirit to deliver value to our members.

OUR VISION

To be a world-class cooperative ensuring the long-term success of our employees and customers.

AGRONOMY

Spend the summer expanding your knowledge alongside the Agronomy Department. Projects for our ag interns may include scouting fields, delivering chemicals, gaining experience in new technologies, and understanding the general operations and sales-side of a cooperative.

GRAIN

Grain interns divide their summer into weekly segments. Experience the grain marketing process from start to finish and every step in between. Opportunities include Kansas wheat harvest, touring grain facilities, loading grain trains, and assisting in the buying and marketing of grain for CVA.

FEED

The Feed Department offers interns a look into the life of a Feed Salesperson. Gain exposure to all aspects of the feed division by job shadowing with team members, working in the different mill locations, and learning the feed accounting process.

ACCOUNTING

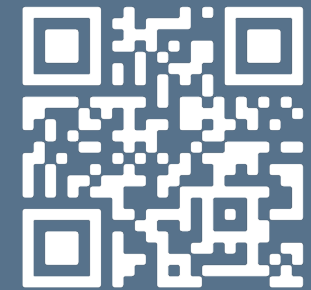

CVA's \$3 billion dollars in sales generates a lot of transactions. Interns will have the opportunity to learn firsthand how a world-class co-op utilizes the latest technology to account for these transactions and forecasts for the future.

INFORMATION TECHNOLOGY

Technology is expanding in every industry, including the agricultural world. Interns will join the 20+ IT Team at CVA and work directly with locations across Nebraska, Iowa, and Kansas for their technology needs.

JOIN THE CVA TEAM!

With our feet firmly rooted in the past, our eyes are locked on the future at Central Valley Ag. As we adapt to an ever-changing world, we invite you to be part of something more.
